

Claude Cowork startup or VM error: diagnose the problem step by step

LearnIA - teaching template - 2026-10-14

Use fictional data for the first trial. Adapt this template to your context and verify the result before using it.

Brief to complete

Objective and intended decision :

Audience and context :

Documents, versions and sources :

Constraints and boundaries :

Expected output format :

Information to confirm :

Reviewer :

Starter instruction

Organize my observations into error text, time, operating system, application version, account plan, failing step and minimal reproduction. Separate observations from possible causes. Suggest one non-destructive test at a time. Do not recommend disabling security controls or deleting VM data.

Quality review

☐ The exact error and version are recorded.

☐ The current official documentation was checked.

☐ A minimal fictional test isolates the failure.

☐ Logs shared with support contain no secrets.

Verification log

Item	Source or calculation	Result	Correction
