

AI voice in 2026: compare speech synthesis, transcription and audio agents

LearnIA - teaching template - 2026-10-14

Use fictional data for the first trial. Adapt this template to your context and verify the result before using it.

Brief to complete

Objective and intended decision :

Audience and context :

Documents, versions and sources :

Constraints and boundaries :

Expected output format :

Information to confirm :

Reviewer :

Starter instruction

Help me design an audio evaluation. First separate narration, transcription and conversation. For my task, propose five original cases, a verifiable reference, scoring criteria and critical errors. Include model, voice, version, settings, format, cost, correction time and permission for recordings. Do not claim to have listened to or tested outputs.

Quality review

☐ The audio task is clearly defined.

☐ Scripts and recordings are authorised.

☐ Sensitive words are checked separately.

☐ Cost includes retries and editing.

Verification log

Item	Source or calculation	Result	Correction
