

TypeSafe Jev: decision models, real benchmarks and limitations

LearnIA - teaching template - 2026-10-14

Use fictional data for the first trial. Adapt this template to your context and verify the result before using it.

Brief to complete

Objective and intended decision :

Audience and context :

Documents, versions and sources :

Constraints and boundaries :

Expected output format :

Information to confirm :

Reviewer :

Starter instruction

Prepare a fictional-message routing pilot for billing, technical and human review. Define allowed options, ten ambiguous cases, human reference labels, critical failures and a calibration protocol with a separate validation set. Include a simple rule and a structured-output LLM as baselines. Make no calls and invent no scores.

Quality review

[] The publisher is identified.

[] Schema validity and correctness are separate.

[] Thresholds use separate validation data.

[] Ambiguous cases can reach human review.

Verification log

Item	Source or calculation	Result	Correction
