

AI models in October 2026: OpenAI, Gemini, Claude, Meta, Grok, Mistral and DeepSeek

LearnIA - teaching template - 2026-10-14

Use fictional data for the first trial. Adapt this template to your context and verify the result before using it.

Brief to complete

Objective and intended decision :

Audience and context :

Documents, versions and sources :

Constraints and boundaries :

Expected output format :

Information to confirm :

Reviewer :

Starter instruction

Help me compare models for a specific task. Define fictional test inputs, an expected result, five verifiable criteria and one critical failure. Create a table for model version, tools, reasoning settings, cost, total duration and corrections. Do not claim to have run the trials or choose a winner before results exist.

Quality review

☐ Every candidate receives the same task and inputs.

☐ Versions and tools are recorded.

☐ Critical errors block acceptance.

☐ Costs include retries and review.

Verification log

Item	Source or calculation	Result	Correction

Approval and next step
